## WHY TO TAKE CaD FORMULA (For Calcium and Vit. D Supplement)

Problem 1

Inadequate Absorption of Calcium and Vit. D Ca D Formula is required because

Problem 2

Reduced ansorption of Calcium by Consumption of chocolate, coffee, alcohol, Meat and sugar1 and excess consumption of any sweetener (e.g. honey, rice syrup, etc.),

Problem 4

Risk of Renal stones

Problem 5

Calcium and Vit. D related disorders

Problem 3 Inadequate consumption of Vit. D and Calcium by infants and children

- 1. When taken mixed with flour, it provides maximum absorption of vitamin D and hence Calcium
- 2. CaD formula is protective of calcium deficiency created by chocolate, coffee, alcohol, sugar and any sweetener consumption.
- 3. It provides good growth in children as per recommendation of AAP (American Academy of pediatrician)
- 4. Calcium and Vitamin D supplement with CaD formula have lower risk of renal stones
- 5. CaD formula is also protective from health problems due to Vitamin D Deficiency.
